WEEKLY NEWS

Friday 17th January, 2025 - Issue 17

A Message from Mrs Wathen and Mr Spink

Good afternoon everyone.

This week the weather cheered up a little and so we have been able to get everyone back out on the playground as the bulk of the snow and ice departed.

We were visited by the Dog's Trust this week. From Wednesday to Friday, they came in to deliver workshops and assemblies on dog safety. This covers what to do and how to act if you see a dog while out in the community. See our social media for photographs.

This week we also emailed you about a Healthy Eating workshop for parents. If you are interested in this, please reply to the school email to secure a place. These will be given on a 'first come, first served' basis. Next week, Year 5 will be heading to Murton Park to explore all things Roman. Also our football team have a match with our friends at Shakespeare Primary, where they will be playing at home. Have a super weekend. See you all on Monday.

N - 86%	RBT - 99%	RDO - 92%
1AD - 99%	1MM - 97%	2HW - 99%
2RK - 96%	3JH - 91%	3NB - 94%
4CS - 97%	4RM - 97%	5NP/LW - 86%
5HW - 95%	6FA - 100%	6LB - 99%

Whole School attendance this week is 95%.

We are aiming for 96% or above.

Biscuit Bears: RBT, 1AD, 2HW & 6FA
Extra Play (97%+): 1MM, 1AD, 2HW, 4CS, 4RM, 6FA & 6LB
Pizza Party (100%): 6FA

DIARY DATES 2025

Tuesday 21st January 2025 - Football match at home

Thursday 23rd January 2025 - Y5 trip to Murton Park

Monday 27th January 2025 - School nurses in School

Tuesday 28th January 2025 - Football match away

Wednesday 29th January 2025 - Y1 Trip to Skipton Castle

Thursday 30th January 2025 - Y6 trip to Murton Park

5th & 6th February 2025 - Y6 Parent Consultations

Monday 10th February 2025 - LKS2 Viking Workshop in school

Monday 10th February 2025 - Parents Healthy Eating Workshop

Wednesday 12th February 2025 - Young Voices concert

Thursday 13th February 2025 - School closes for Half-term holiday

Monday 24th February 2025 - School reopens for Spring 2

Community Pantry

With thanks to our charity partners, our
Community Pantry is open to our
families on **Wednesdays** at 2:30pm.

Due to demand our food is given on a
first come, first served basis. Please
only take one of each item that you
need.

Contact the school office if you need support at another
time: admin@eborgardensacademy.co.uk or speak to a
member of the team.

At The National College, our WakeUpWednesday guides empower and equip parents, carers and educators with the confidence and practical skills to be able to have informed and age-appropriate conversations with children about online safety, mental health and wellbeing, and climate change. Formerly delivered by National Online Safety, these guides now address wider topics and themes. For further guides, hints and tips, please visit nationalcollege.com.

What Parents & Educators Need to Know about

TIKTOK

AGE RESTRICTION
13+
(Certain features are restricted to over-18s only)

WHAT ARE THE RISKS?

Adults tend to associate online videos with YouTube – but among teens, TikTok is king. The app provides a stream of short clips tailored to users' interests, based on what they've already watched. Around half of British children use TikTok, and while much of the content is benign, Ofcom considers it the app where youngsters "were most likely to encounter a potential harm".

AGE-INAPPROPRIATE CONTENT

While TikTok's Following feed only displays videos from familiar creators, For You is a collection based on a user's previously watched clips. Most of these videos will probably be inoffensive, but the app could potentially show something unsuitable. If children then engage with this content, more like it will follow. TikTok's guidelines prohibit the sharing of illegal or inappropriate content, but the huge number of uploads means that a small amount inevitably slips through.

BODY IMAGE AND DANGEROUS CHALLENGES

According to Ofcom, most online harms for teens are body image related for girls (promoting unhealthy eating, body shaming and so on) and dangerous stunts for boys. Both are prevalent on TikTok. One extreme example of the latter was the 'blackout' trend, which encouraged users to hold their breath until they passed out from a lack of oxygen. This led to two families filing lawsuits against TikTok over the tragic deaths of their children.

IN-APP SPENDING

TikTok is free, but users have the option to buy TikTok coins, which can be used to purchase gifts for content creators. Coin bundles range from £9.99 to an eye-watering £99; while that may not sound appealing, the app still generated £7.9 billion in user spending in 2023. TikTok's policy is that under-18s can't make in-app purchases, but it's possible to bypass this with a fake birth date.

CONTACT WITH STRANGERS

With more than 1.5 billion users globally, the potential for contact from strangers on TikTok is high – especially as accounts created by over-18s (or young people using a fake date of birth) are set to public by default. This means that not only is someone's profile visible to everyone else on the app, it also suggests their videos to others and enables anyone to download or comment on them.

MISINFORMATION AND RADICALISATION

Although the short videos on TikTok tend to be more frivolous than the longer ones on YouTube, clips can still influence impressionable minds in a negative way. Not only is there plenty of dangerous misinformation on TikTok, but Ofcom reports that nearly a third of 12 to 15-year-olds use TikTok as a news source – so you should be wary of misogynistic, racist or conspiracy-themed material shaping how they see the world.

ADDICTIVE DESIGN

With its constant stream of eye-catching videos, TikTok can be addictive to young brains. In 2024, UK children spent an average of 127 minutes per day on the app: that's twice as much as in 2020. Excessive use can interfere with young people's sleep patterns – often leading to irritability – and distract them from other, healthier activities. The instantly skippable nature of bite-size videos may also impact children's ability to maintain focus.

Advice for Parents & Educators

ENABLE FAMILY PAIRING

Family Pairing allows parents to link their TikTok account to their child's, and control settings remotely. Parents can then turn on Restricted Mode (reducing the chances of a child seeing inappropriate content), set screen-time limits, make accounts private and manage whether their child can send messages – and if they can, to whom. Children can't alter these settings without parental approval.

BLOCK IN-APP SPENDING

If a child is using an iPhone or Android device to access TikTok, you can alter their settings to prevent them from making in-app purchases. We'd recommend enabling this feature, as it can be quite easy for a young person to spend a significant amount of real money buying TikTok coins to unlock more features of the app – sometimes without even realising.

DISCUSS THE DANGERS

If a child wants to use TikTok and you're happy for them to do so, it's good practice to discuss the potential risks. Ensure that they don't share any identifying personal information, and that they know to talk to a trusted adult if they're worried by interactions on the app. With more teens using TikTok for news, it's also worth talking about misinformation and propaganda, and how to identify it.

READ THE SIGNS

If you're concerned that a child is spending too much time on TikTok, or that they've been emotionally affected by something they've seen, it's important to know how to spot the signs. Increased irritability and a lack of concentration are potential red flags, as is failing to complete homework or skipping meals. Remember, the parental controls are there for a reason, and it's never too late to introduce limits.

What Parents & Educators Need to Know about AI VIRTUAL FRIENDS

Artificial intelligence has seen significant development over the recent months, with companies releasing new AI-based software or adding an AI element to existing apps (such as Snapchat). One form of AI that has become especially popular has been the 'AI friend' or chatbot. There are now numerous 'virtual friend' apps available, with other successful platforms likely to adopt it soon.

WHAT ARE THE RISKS?

CONTENT AND ACCOUNTABILITY

AI chatbots may not always recognise when content is age inappropriate or harmful and should be filtered out. As a result, there's a possibility that children could be exposed to offensive language or explicit material while conversing with their virtual friend. The companies producing such AI solutions are also unlikely to take responsibility for any content that their algorithms generate.

REDUCED SOCIAL CONTACT

An excessive reliance on chatbots for social interaction could potentially cause a child to begin reducing the amount of face-to-face communication they have, leading to social isolation. If young people become dependent on chatbots to provide companionship, it could possibly hinder the development of their real-life social skills.

LACK OF SENSITIVITY

Chatbot software isn't always sophisticated enough to pick up on subtle emotional cues or recognise signs of distress in children, as most humans would. It might therefore fail to respond appropriately. AI misinterpreting what it's being told or replying insensitively to a young user who's already struggling could potentially impact a child's emotional wellbeing or exacerbate any existing emotional issues.

UNINTENTIONAL BIAS

AI companions are only as reliable as the information they've been programmed with. The algorithms they use, therefore, may unintentionally promote bias, stereotypes or discriminatory behaviour. As many chatbots originate from the USA or UK, for instance, they can display a distinctly western-centric worldview. This could lead to children developing skewed attitudes and behaviours if they interact with the AI consistently.

COGNITIVE LIMITATIONS

Although many are now undeniably advanced, AI-powered chatbots still have limitations in terms of understanding complex concepts, context and nuance. Depending heavily on chatbots to help with learning or solving problems may stunt the development of a child's own powers of critical thinking, their creativity and their ability to engage in open-ended discussions with other people.

PRIVACY CONCERNS

Chatbots typically collect data about users, including personal information and conversations. This is ostensibly to improve their performance as they gradually learn about our behaviour – but many experts warn that there may be significant risks associated with how this information is stored and used (for instance, the possibility of potential breaches or misuse by third parties).

Advice for Parents & Carers

CHAT ABOUT CHATBOTS

If a child is already expressing an interest in AI apps, then a relaxed, natural chat should help you to discover which ones they're aware of and how they're using them (or are planning to). Discuss these options with children and perhaps do your own research to ensure that you think they're suitable. Once you're totally happy, you could sit and explore the range of AI chatbots together.

CREATE A SAFE ENVIRONMENT

If a child is keen to engage with AI chatbots, encourage them to do so in a safe environment: ideally in a shared space, so you can easily keep an eye and ear on their progress. Set up appropriate content filtering measures in advance – and gently remind them that you'll be close by and ready to help with any questions or concerns that may arise.

FIND A BALANCE

Work alongside children to establish the right balance in terms of how they might use AI-powered chatbots – and when it's appropriate, it's important to make sure that children still get plenty of opportunities to learn to solve problems for themselves, as well as building their interpersonal skills through face-to-face conversations with friends, family members and teachers.

TAKE CONTROL

As with any form of app or game, when it comes to AI chatbots we'd strongly recommend that you consider employing parental controls (either on the device being used or within the software itself) to manage which apps children can download and interact with. This is particularly important for younger children, who may be more at risk of being upset or frightened by inappropriate content.

RECOGNISE THE RISKS

It's unlikely that most children will have even considered the potential risks attached to having a virtual companion. So it's probably wise to explain some of the possible hazards and challenges of AI chatbots to them. Emphasise that AI isn't a real person (however much it might sound like one) and may occasionally tell them something inaccurate or skewed by bias.

Meet Our Expert

A Certified Information Systems Security Professional (CISSP), Gary Henderson is the Director of IT at a large boarding school in the UK, having previously taught in schools and colleges in Britain and the Middle East. With a particular interest in digital citizenship and cyber security, he believes it is essential that we become more aware of the risks around technology, as well as the benefits.
